ABOUT ME

As a highly motivated and ambitious 3rd year engineering student I am passionate about data science and Artificial Intelligence. I'm a fast learner and a great problem solver with a proven ability to thrive in high-pressure environments.

My current goal is to improve my technical skills and gain experience solving real-world problems

EDUCATION

National Institute of Applied Sciences and Technology (INSAT)

2020-2025

- Computer Networks and Telecommuncations Engineering

Sadiki Highschool

2020

- Mathematics Major
- National exam with highest hinors (16.38/20)
- SAT score of 1360/1600

RELEVANT SKILLS

Data Science

- Data analysis (mathematical understanding, programming tools)
- Understanding of machine learning and deep learning models and their implementation

Python

- Basics, numpy, pandas, matplotlib...

Java

- OOP concepts, GUI, multi-threading, serialization, collections...

Linux OS

- Basics, Networking, bash scripting...

Web Development

- HTML, CSS, bootstrap, JavaScript, PHP, Symfony

UML design

PROJECTS

Student absence management mobile application

- I developed a machine learning model that can predict student absence based on various information

Fire and asphyxiation danger prevention device

- Development of the code and structure of a device that detects excess gas in kitchens and alerts the user through audio and visual alert signals as well as MQTT messages on his phone
